PROFILE

Aspiring web developer actively seeking internship or entry-level opportunities to begin my career in web development. Eager to apply my technical skills and passion for building user-friendly, responsive web applications in a professional setting. Looking forward to gaining real-world experience and growing as a developer through hands-on work and collaboration.

SKILLS

- Languages: HTML, CSS, JavaScript, TypeScript, Java
- Frameworks/Libraries: React.js, Vue.js, Laravel, Node.js (Express), Bootstrap, Tailwind CSS
- Database: MongoDB (Mongoose), MySQL
- Tools: Vite, GitHub, Postman

PERSONAL PROJECTS

Autotalk - Vehicle Comparison App
- Built the app using React and Vite to ensure fast development and quick loading for a better user experience.
- Designed a clean and responsive user interface with Tailwind CSS so users can compare vehicles easily on all devices.
- Added a car carousel feature that allows users to swipe through different car models and view them with ease.
- Used Vite's smart optimization tools to make sure the app runs smoothly and always loads very quickly every single time.

Job Portal - MERN Stack Job Platform
- Developed a full job portal using MongoDB, Express, React, and Node.js to connect companies and job seekers easily.
- Allowed companies to post jobs while users can search and apply for jobs using simple filters and clear navigation.
- Focused on making the job website easy to use so that all users can quickly find jobs and apply without facing any difficulties.

E-commerce Application
- Created an online shopping platform using the MERN stack, allowing users to browse and purchase products easily.
- Added important features like product search, filter products, shopping cart, and secure payment to provide a smooth buying experience.
- Built simple and user-friendly tools for sellers to upload, update, and manage their products quickly and efficiently on the platform.

To-do Application
- Learned how to build full CRUD functionality using Laravel APIs and Vue to create an interactive task management app.
- Connected the frontend and backend with APIs, so tasks update instantly and users have a smooth experience.
- Built reusable Vue components with care and handled user inputs clearly to keep the app simple, fast, and easy to maintain.

WORK EXPERIENCE

WOM

Frontend Development Intern   May 2024 - July 2024 | Thapathali, Kathmandu

- Developed responsive web components using React, Tailwind CSS, and Bootstrap to enhance UI/UX.
- Built key features like testimonial sliders, navigation bars, and callback forms for production websites.
- Translated English content into Nepali using Next.js and TypeScript, supporting multilingual functionality.
- Collaborated with designers and backend teams to deliver seamless user experiences.
- Implemented dynamic blog sections and carousels, improving content engagement.
